

DRAKE SPECIALTIES

Metal Safety Spray Shields

- New, simple and effective, patent pending design.
- Made from 316 stainless steel.
- Stainless steel netting absorbs and dissipates pressurized sprays by distributing it around the flange circumference.
- No tools required, installs quickly via the adjustable fastening clamp.
- Optional 316 stainless steel worm gear hose clamp.
- Contains no sharp edges.
- Re-usable.
- Available for all size flanges, including square and oval shaped flanges.
- Maximum operating temperature of 2000°F.
- Maximum operating pressure of 3000 psi.
- Recommended for hazardous processes of high temperatures, high pressures, and aggressive chemicals.
